Professional Summary

Computer Science undergraduate and MERN Stack Developer with frontend development internship experience and two deployed full-stack projects, including an e-commerce application with secure Razorpay payment verification and a property listing platform. Skilled in building responsive React.js interfaces and developing REST APIs using Node.js, Express.js, and MongoDB. Solved 100+ problems on LeetCode to strengthen my problem-solving skills.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering 2023 – 2027
Swami Vivekanand Subharti University, Meerut CGPA: 7.0/10
High School: Class XII (Intermediate): 72.32% — Class X (Matriculation): 65.54%

Experience

Frontend Developer Intern August 2026 – October 2026
Credit Bucket Technology Pvt. Ltd.

- Contributed to the frontend development of a FinTech application using React.js.
- Developed and improved user-facing interface components.
- Tested REST APIs using Postman to validate API responses and functionality.
- Worked in a real-world project environment with a focus on usability and functionality.
- Worked on frontend features supporting the loan application flow, including submission of verified documents.
- Integrated backend REST APIs into the frontend using Axios and Fetch API, with async/await and try-catch for error handling.

Projects

GenZVibe – Full-Stack E-commerce Application GitHub Live Demo
Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, bcryptjs, Multer, Cloudinary, Razorpay

- Developed a full-stack e-commerce platform with separate customer and admin functionalities, integrating a React.js frontend with RESTful APIs built using Node.js and Express.js, backed by MongoDB.
- Implemented secure user authentication with JWT and bcryptjs-based password hashing, along with role-based authorization to protect admin-only routes and APIs.
- Integrated Multer and Cloudinary to handle product image uploads and cloud-based image storage.
- Integrated Razorpay payment gateway with server-side signature verification to validate payment authenticity before order creation.

Nestio – Full-Stack Property Listing Platform GitHub Live Demo
Tech Stack: Node.js, Express.js, MongoDB, Mongoose, EJS, Passport.js, Joi, Multer, Cloudinary, MapLibre GL JS, Nominatim API

- Built listing creation, editing and browsing for a full-stack property platform with server-rendered EJS views, Node.js, Express.js and MongoDB.
- Implemented session-based authentication with Passport.js and MongoDB-backed session storage.
- Added server-side validation with Joi so listing data is checked before it is saved, and handled property image uploads with Multer and Cloudinary.
- Integrated interactive maps using MapLibre GL JS and OpenStreetMap, with the Nominatim API geocoding each listing's address into a map marker.

DevColab – Real-Time Collaborative Coding Platform (In Progress)
Tech: React.js, Node.js, Express.js, MongoDB, Socket.IO, Monaco Editor

- Developing a collaborative coding platform where multiple users can work together in shared coding rooms.
- Integrating Monaco Editor to provide a smooth code-editing experience.
- Working on real-time collaboration using Socket.IO and JavaScript code execution.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, React.js, Vite, Tailwind CSS, Axios
Backend: Node.js, Express.js, REST APIs, JWT Authentication, bcryptjs, Multer, Razorpay Integration
Databases & Cloud: MongoDB, Mongoose, MySQL, Cloudinary
Programming Languages: Java, JavaScript, C
Core Concepts: Object-Oriented Programming (OOPS), Data Structures and Algorithms (DSA)
Problem Solving: 100+ DSA problems solved on LeetCode
Tools: Git, GitHub, Postman (API Testing), VS Code

Certifications

- JavaScript (Basic and Intermediate) – HackerRank
- Experimental Robotics and Soft Skills – NPTEL
- Web Development – freeCodeCamp
